Vänligen förvara säkert!

English: The house you have purchased was manufactured in accordance with the high quality norms. The building unit has been carefully inspected and packed. In order to avoid possible problems during the assembly carried out by yourself or the building company of your choice, we recommend that you inspect the delivery for its completeness in accordance with the list of pieces before assembly. This inspection must be carried out within 14 days after delivery to your place. Warranty claims are limited to the exchange of defective materials. Defective building parts, which have already been used or painted, are excluded from being replaced. All further claims are excluded! In cases of complaints, please pay attention to the following procedures: Please present this inspection certificate along with the sales receipt to your place of purchase. Only in cases where these documents are presented will the complaint be dealt with quickly and without complications.

Norsk: Produktet du har kjøpt, ble produsert i henhold til høye kvalitetskrav. Produktet har blitt kontrollert nøye og deretter omhyggelig pakket. For å unngå mulige problemer under monteringen, uansett om du gjør det selv eller får en godkjent håndverker til å gjøre det, anbefaler vi at du kontrollerer leveransen mot delelisten for å se om alle delene er inkludert. Denne kontrollen må gjøres innen 14 dager etter at delene ble levert til din adresse. Garantikrav begrenser seg til bytte av defekte deler. Defekte elementer som allerede har blitt brukt eller malt/beiset/limt, vil ikke bli erstattet. Alle andre krav er utelukket! Dersom du har en reklamasjon, vennligst gjør som følger: Lever dette kontrollskjema med kvitteringen til salgsstedet. Bare når du har med disse dokumentene kan klagen behandles raskt og uten komplikasjoner.

Dansk: Det købte hus er fremstillet i overensstemmelse med de høje kvalitetskrav. Produktet er blevet omhyggeligt inspiceret og pakket. For at undgå eventuelle problemer i løbet af monteringen udført af dig selv eller håndværker af dit eget valg, anbefaler vi, at du undersøger leverancen for fuldstændighed i overensstemmelse med listen over dele før samling. Denne inspektion skal foretages inden 14 dage efter levering til din plads. Garantikrav er begrænset til udveksling af defekte materialer. Defekte bygningsdele, som allerede er brugt eller malet, er udelukket fra at blive erstattet. Alle yderligere krav er udelukket! I tilfælde af klager, skal du være opmærksom på følgende procedurer: Venligst præsenter denne kontrol certifikat sammen med kvitteringen til det sted hvor produktet er købt. Kun i de tilfælde, hvor disse dokumenter er forelagt kan klagen behandles hurtigt og uden komplikationer.

Suomi: Ostamasi mökki on valmistettu korkeita laatuvaatimuksia noudattaen. Rakennus on huolella tarkastettu ja pakattu. Jotta pystytys joko itsesi tai valitsemasi rakennusliikkeen toimesta sujuisi ongelmitta, suosittelemme, että tarkistat toimituksen sisällön osaluettelon avulla ennen kokoamisen aloittamista. Tämä tarkistus tulee tehdä 14 päivän kuluessa toimituksesta. Takuuvaateet rajoittuvat viallisten materiaalien vaihtamiseen. Viallisia osia, joita on jo käytetty ja jotka on maalattu, ei vaihdeta uusiin. Lisävaatimuksia ei huomioida! Mahdollisissa valitustapauksissa toimi seuraavasti: Esitä oheinen tarkastustodistus ja kassakuitti ostopaikassa. Valituksen nopea ja mutkaton käsittely edellyttää näiden asiakirjojen esittämistä.

Svenska: Huset du köpt har tillverkats i enlighet med de högsta kvalitetsstandarderna. Byggnadens delar har noggrant besiktigats och förpackats. För att undvika eventuella problem under monteringen som du utför själv eller låter en hantverkare att utföra, rekommenderar vi att du, innan monteringen påbörjas, besiktigar leveransen för att säkerställa att den är komplett enligt förteckningen över ingående delar. Denna besiktning måste utföras inom 14 dagar efter att du tagit emot leveransen. Garantianspråk är begränsade till ersättning av defekt material. Defekta byggnadsdelar, vilka redan har använts eller målats, ersätts inte. Alla vidare anspråk avvisas! I händelse av reklamationer, vänligen uppmärksamma följande: uppvisa detta besiktningsprotokoll tillsammans med inköpsbeviset till ditt inköpsställe. Endast om dessa dokument uppvisas kan vi garantera att reklamationen behandlas skyndsamt och utan krångel.

1 General information

Dear client,

We are glad that you have decided in favour of our garden house!

Please read the assembly manual carefully before proceeding with the house installation! You will thus avoid problems and will not waste time.

Recommendations:

- Keep the house package until its complete assembly in a dry place, but not in direct contact with the ground, protected from weather conditions (moisture, the sun, etc.). Do not keep the house package in a heated room!
- When selecting the garden house location, make sure that the house will not be subjected to extreme weather conditions (areas of strong snowfall or winds); otherwise you should attach the house (for instance, with anchors) to the subsoil.

Warranty

Your house is made from high quality fir and delivered in the natural (unprocessed) form. If, despite our thorough inspection, you should have complaints, please submit the filled out control sheet and purchase invoice to the product seller.

ATTENTION: Please be sure to keep the documentation accompanying the house package! The control sheet includes the control number of the house. We can only review complaints if you submit the control number of the house to the seller!

The warranty does not cover:

- Peculiarities of wood as a natural material
- Wooden details already painted (processed with a wood preservative)
- Wooden details containing whole branches that do not endanger the stability of the house
- Colour tone variations caused by wood structure differences that do not influence wood lifetime
- Wooden details containing (caused by drying) small cracks/gaps that do not pass through and do not influence the structure of the house
- Twisted wooden details if they can nevertheless be installed
- Roof and floor boards that may have on their concealed surfaces some non-planed areas, colour differences and waning
- Complaints resulting from an incompetent manner of the installation of the house or the house subsiding due to an incompetently made foundation
- Complaints caused by introducing self-initiative changes to the house, such as the deformation of wooden details and doors/windows due to an incompetent manner of wood processing; the attachment of storm braces too rigidly, doorframes being screwed onto wall logs, etc.

The complaints covered by the warranty are satisfied to the extent of replacing the deficient/faulty material. All other demands will be excluded!

Garden house painting and maintenance

Wood is a natural material, growing and adapting depending on weather conditions. Large and small cracks, colour tone differences and changes, as well as a changing structure of wood are not errors, but a result of wood growing and a peculiarity of wood as a natural material.

Unprocessed wood (except for foundation joists) becomes greyish after having been left untouched for a while, and can be turn blue and become mouldy. To protect the wooden details of your garden house, you must immediately process them with a wood preservative.

We recommend that you cover the floor boards in advance with a colourless wood impregnation agent, especially the bottom sides of the boards, to which you will no longer have access when the house is assembled. Only this will prevent moisture penetration.

We definitely recommend that you also process the doors and windows with a wood impregnation agent, and do that namely both inside and outside! Otherwise the doors and windows can become twisted.

After the house assembly is completed, we recommend for the conclusive finishing a weather protection paint that will protect wood from moisture and UV radiation.

When painting, use high quality tools and paints, follow the paint application manual and manufacturer's safety and usage instructions. Never paint a surface in strong sunlight or rainy weather. Consult a specialist regarding paints suitable for unprocessed softwood and follow the paint manufacturer's instructions.

Having been properly painted, your garden house's lifetime will increase substantially. We recommend that you inspect the house thoroughly once every six months.

2 Preparation for assembly

Tools and preparation of components

To assemble the garden house, you will need the following tools:

assembly aid

ladder

hammer

water-level

screwdriver

saw

knife

measuring tape

pliers

drill

ADVICE: To avoid splinters, we recommend that you wear the corresponding protective gloves during the assembly process.

We wish you total success with the garden house installation and much joy with this house for many years to come!

1 Generell informasjon

Kjære kunde,

det gleder oss at du valgte hagehuset vårt!

Les monteringsanvisningen grundig før du går i gang med å sette sammen huset! For å unngå problemer og bruk av unødig tid.

Husk:

- La huset være innpakket og oppbevar det på et tørt sted, ikke i direkte kontakt med bakken og godt beskyttet mot vær og vind (fuktighet, solskinn osv.), helt frem til arbeidet påbegynnes. Huspakken må ikke oppbevares i et oppvarmet rom!
- Kontrollerer leveransen mot delelisten for å se om alle delene er inkludert, før du starter monteringen. Sorter delene i samsvar med monteringsanvisningen og legg de fire sidene ut i forhold til monteringsrekkefølgen.

Garanti

Dette huset er fremstilt av høykvalitets gran (furu brukes i enkelte tilfeller) og leveres ubehandlet. Dette huset har gjennomgått en grundig inspeksjon. Dersom du likevel skulle ha grunn til reklamasjon, ber vi deg fylle ut kontrollskjema og sende det sammen med kjøpsbeviset og kvitteringen til forhandleren.

OBS: Sørg for å oppbevare all dokumentasjon som følger med huspakken! Husets serienummer er oppført på kontrollskjema. Vi kan kun behandle en reklamasjon dersom du sender husets serienummer til forhandleren!

Garantien dekker ikke:

- Særegenhet i treverket som et naturlig materiale
- Deler som allerede er behandlet (malt, grunnet)
- Deler av huset som inneholder hele kvister som ikke representerer en fare for husets stabilitet
- Variasjoner i fargetone som er forårsaket av forskjeller i trestrukturen og som ikke har betydning for treverkets levetid
- Deler av huset som sprekker på grunn av tørking, dvs. små sprekker/ riss som ikke er gjennomgående og som ikke påvirker husets struktur
- Deler av vridd tre som likevel kan monteres
- Tak- eller gulvplank som på skjulte overflater kan oppvise uhøvlede områder, fargeforskjeller og vankant
- Reklamasjoner fordi huset er blitt montert på ukyndig måte eller fordi huset sigrer på grunn av ukyndig utført fundament
- Reklamasjoner fordi det er blitt gjort endringer på huset på eget initiativ, som f.eks. formendringer på deler av tre eller dører/ vinduer. På grunn av ukyndig behandling av treverket; at stormavstivere er festet for stramt, dørkarmen er blitt skrudd inn i veggbord eller lignende.

Reklamasjonene som dekkes av garantien er begrenset til å omfatte erstatning av manglende/ feil materiale. Alle andre krav er utelukket!

Produsent forbeholder seg retten til å endre tekniske egenskaper ved produktet.

Maling og vedlikehold av hagehuset

Tre er et naturlig materiale som beveger og tilpasser seg i forhold til værforholdene. Større eller mindre sprekker, fargeforskjeller og endringer samt ulikheter i treets struktur er ikke feil, men et resultat av treets vekst og en særegenhet i treverket som et naturlig materiale.

Ubehandlet treverk blir grått hvis det blir værende ubehandlet over tid og kan bli blått og begynne å råtne. For å beskytte treverket i hagehuset, må det før montering behandles med grunning.

Alle deler må behandles med grunning (f. eks. Visir) på alle sider (innvendig og utvendig), laftespor, not og fjær, før montering. Husk: Endeved 3-4 strøk vått i vått. Grunn vinduer og dører på alle sider. Grunn tak/gulvbord på alle sider.

Hvorfor grunning?

Det er ekstra mye endeved i en laftehytte. Hvert eneste laftespor har endeved. Det er endeveden som tar til seg mest fuktighet i treverk. Ved produksjon av en laftehytte blir treverket tørket før det blir produsert. Dette gjør at delene lettere tar til seg fuktighet når pakken blir åpnet. Tørket trevirke som blir utsatt for fuktighetssvingninger vil ofte vri seg og skape spenninger i treverket som kan utløse mange problemer. En grunning sin viktigste funksjon er å redusere fuktoptak og dermed redusere spenningsproblemer. Den andre viktige funksjonen til en grunning er å hindre dannelse av sopp og råte. Dette oppstår gjerne på steder som har dårlig lufting, som f. eks. i laftesporene. Når huset er ferdig montert, må det ferdige huset behandles med et værbestandig malingsstrøk utvendig som beskytter treverket mot fuktighet og UV-stråler. Innvendig må huset etterbehandles i henhold til bruksmønster.

Bruk maleredskaper og maling/ beis av høy kvalitet når du maler huset. Følg anvisningene på spannet og produsentens sikkerhets- og bruksanvisninger. Du må aldri male en overflate i sterkt sollys eller i regnvær. Forhør deg hos en malerspesialist når det gjelder hvilken maling som egner seg for ubehandlet myktré, og følg anvisningene fra produsenten.

Dersom huset er blitt malt på riktig måte, vil husets levetid forlenges betraktelig. Vi anbefaler at du inspiserer huset grundig hvert halvår.

2 Foreberedelse før montering

Verktøy og forberedelse før montering

Du trenger følgende verktøy ved montering:

monteringshjelp

stige

hammer

drill

vater

skrutrekker

sag

kniv

målebånd

avbiter tang

OBS: For å unngå flis anbefaler vi bruk av hansker under monteringen.

Vi ønsker deg lykke til med det nye hagehuset og håper du får glede av det i mange år!

1 Yleistä tietoa

Hyvä asiakas,

Olemme iloisia, että valintasi kohdistui tuotteeseemme!

Ole hyvä ja lue kokoamisohje huolellisesti ennen pystytyksen aloittamista! Tämä auttaa välttämään ongelmia ja säästää aikaa.

Suosituksia:

- Säilytä pystytystä odottava mökkipaketti kuivassa paikassa, joka ei ole suorassa kosketuksessa maan kanssa, ja säältä suojassa (kosteus, aurinko jne.). Älä pidä pakettia lämmitetyssä tilassa!
- Valitessasi mökille paikkaa varmista, ettei se tule joutumaan alttiiksi äärimmäisille sääoloille (voimakkaalle lumentulolle tai koviille tuulille); muuten se tulee kiinnittää (esim. ankkureilla) maaperään.

Takuu

Mökkisi on valmistettu korkealuokkaisesta kuusesta ja toimitetaan luonnollisessa (käsittelemättömässä) muodossa. Mikäli perusteellisesta tarkastuksestamme huolimatta sinulla on tuotteesta huomautettavaa, ole hyvä ja toimita täytetty valvontailmoitus ja ostolasku tuotteen myyjälle.

HUOM! Muista säilyttää mökkipaketin mukana tulevat asiakirjat! Valvontailmoituksessa on tuotteen valvontanumero. Mahdollisten valitusten käsittely edellyttää, että mökin valvontanumero ilmoitetaan myyjälle!

Takuu ei kata seuraavia:

- Puun erikoispiirteet luonnonmateriaalina
- Puuosat, jotka on jo maalattu (käsitelty kyllästysaineella)
- Puuosien oksakohdat silloin, kun ne eivät vaaranna mökin vakautta
- Puun rakenteesta johtuvat sävyerot, jotka eivät vaikuta puun kestävyteen
- Puuosissa olevat (kuivumisen aiheuttamat) pienet halkeamat/raot, jotka eivät mene puun läpi, eivätkä vaikuta talon rakenteeseen
- Taipuneet puuosat, jotka voidaan kaikesta huolimatta asentaa
- Katto- ja lattialaudat, joiden piiloon jäävällä puolella saattaa olla höyläämättömiä kohtia, värieroja tai vajaasärmia
- Valitukset, jotka johtuvat mökin virheellisestä pystytyksestä tai puutteellisen perustuksen aiheuttamasta vajoamisesta
- Valitukset, jotka johtuvat mökkiin oma-aloitteisesti tehdyistä muutoksista, kuten taitamattomasta käsittelystä johtuva puuosien ja ovien/ikkunoiden vääntyminen; jäykisteiden liian tiukka asentaminen, ovenkarmien ruuvaaminen seinäpuihin yms.

Takuun piiriin kuuluvat huomautukset hoidetaan vaihtamalla viallinen/väärä materiaali uuteen. Muita mahdollisia vaateita ei huomioida!

Mökin maalaaminen ja huolto

Puu on luonnonmateriaali, joka laajenee ja elää sääolojen mukaan. Pienet ja suuret raot, värisävyerot ja -muutokset sekä puun rakenteen vaihtelu eivät ole virheitä, vaan ne johtuvat puun laajenemisesta ja luonnonmateriaalin ominaisuuksista.

Käsittelemätön puu (lattiapalkkeja lukuun ottamatta) muuttuu ajan myötä harmahtavaksi, ja saattaa sinertyä ja homehtua. Tämän vuoksi mökin puuosat tulee välittömästi suojata kyllästysaineella.

Lattialaudat kannattaa käsitellä etukäteen värittömällä puunkyllästysaineella, etenkin lautojen alapinnat, joihin ei pääse käsiksi enää mökin pystytyksen jälkeen. Se on ainoa keino estää kosteutta imeytymästä puuhun.

Myös ovet ja ikkunat tulee käsitellä kyllästysaineella niin sisä- kuin ulkopuolelta! Muuten on vaara, että ovet ja ikkunat vääntyvät.

Mökin pystytyksen jälkeen se kannattaa käsitellä kauttaaltaan sään vaikutuksilta suojaavalla maalilla, joka suojaa puuta kosteudelta ja UV-säteilyltä.

Maalatessa käytä laadukkaita työvälineitä ja maaleja, noudata maalausohjetta sekä valmistajan turvallisuus- ja käyttöohjeita. Älä koskaan maalaa suorassa auringonpaisteessa tai sateella. Kysy asiantuntijalta käsittelemättömälle havupuulle sopivista maaleista ja noudata maalinvalmistajan ohjeita.

Asianmukainen maalaus pidentää rakennuksen käyttöikää huomattavasti. Suosittelemme, että tarkastat mökin huolellisesti joka kuuden kuukauden välein.

2 Pystytyksen valmistelu

Työkalut ja osien valmistelu

Mökin pystyttämisessä tarvitaan seuraavia työkaluja:

apulainen

tikkaat

vasara

vatupassi

ruuvimeisseli

saha

veitsi

rullamitta

pihdit

pora

NEUVU: Tikkujen välttämiseksi käytä asianmukaisia suojakäsineitä kokoamisen aikana.

Toivotamme menestystä mökin kokoamisessa ja kosolti iloa sen parissa tulevina vuosina!

1 Allmän information

Bäste kund,

Vi är glada för att du valt att skaffa ett trädgårdshus från oss!

Vänligen läs monteringsanvisningarna noggrant innan du påbörjar monteringen av huset! Du undviker därigenom problem och spiller ingen tid.

Rekommendationer:

- Förvara husets förpackning, tills det är färdigmonterat, på en torr plats, men inte i direkt kontakt med marken, skyddad från väder och vind (fukt, solljus, etc.). Förvara inte husets förpackning i ett uppvärmt utrymme!
- När du väljer plats för trädgårdshuset, försäkra dig om att huset inte utsätts för extrema väderförhållanden (områden med kraftigt snöfall eller vindar); i så fall bör du förankra huset (till exempel med jordankare) i marken.

Garanti

Ditt hus är tillverkat av gran av hög kvalitet och levereras i naturlig (obehandlad) form. Om du, trots vår noggranna besiktning, skulle ha några reklamationer, vänligen skicka den ifyllda kontrollblanketten och inköpsbeviset till vår återförsäljare.

SE UPP! Vänligen se till att behålla dokumentationen tillsammans med husets förpackning! Kontrollblanketten innehåller husets kontrollnummer. Vi kan enbart granska reklamationer om du skickar med husets kontrollnummer till återförsäljaren!

Garantin omfattar inte:

- Egenheter för trä som ett naturmaterial.
- Redan målade trädetaljer (behandlade med träskyddsmedel)
- Trädetaljer som innehåller hela kvistar som inte äventyrar husets stabilitet
- Variationer i färgton orsakade av olikheter i träets struktur som inte påverkar träets livslängd
- Trädetaljer som innehåller mindre sprickor/spalter (orsakade av torkning) som inte är genomgående och inte påverkar husets konstruktion
- Skeva trädetaljer som ändå går att montera
- Tak och golvbrädor som på sina dolda ytor kan ha vissa ohyvlade områden, färgskiftningar och - mattning
- Reklamationer på grund av oskicklig montering av huset eller sättningskador på grund av en felaktigt uppförd grund
- Reklamationer orsakade av egna ändringar av huset, så som deformation av trädetaljer och dörrar/fönster på grund av ett oskickligt tillvägagångssätt vid montering av trädetaljer; fastsättning av stormbeslag för styvt, dörrkarmar som skruvas i väggreglar, mm.

Reklamationer som omfattas av garantin tillgodoses i den omfattningen att det bristfälliga/felaktiga materialet ersätts. Alla andra anspråk lämnas utan åtgärd!

Målning och underhåll av trädgårdshus

Trä är ett naturmaterial som växer och anpassar sig efter väderförhållanden. Större och mindre sprickor, förändringar och skiftningar i färgton, samt även förändringar i träets struktur är inte felaktigheter, utan ett resultat av träets tillväxt och egenheter för trä som ett naturmaterial.

Obehandlat trä (undantaget grundsyllar) blir gråaktiga efter att ha lämnats orörda ett tag, de kan bli blå och börja mögla. För att skydda trädetaljer på ditt trädgårdshus måste du omedelbart behandla dem med träskyddsmedel.

Installationsmanual - Svenska

Vi rekommenderar att du i förväg täcker golvbrädorna med ett färglöst träimpregneringsmedel, i synnerhet brädornas undersidor vilka du senare inte kommer åt när huset väl är monterat. Endast detta förebygger fuktinträning.

Vi rekommenderar definitivt att du även behandlar dörrar och fönster med ett bra impregneringsmedel och gör det både på in- och utsidan! Annars kan dörrar och fönster bli skeva.

Efter att huset är färdigmonterat, rekommenderar vi att slutbehandla det med en väderbeständig färg som skyddar träet från fukt och UV-strålning.

Använd redskap och färg av bra kvalitet vid målningen, följ användaranvisningen för färgen samt tillverkarens säkerhets- och användarinstruktioner. Måla aldrig en yta i starkt solljus eller vid regnväder. Rådgör med en specialist om färger som lämpar sig för obehandlat barrträ och följ färgtillverkarens anvisningar.

Husets livslängd förlängs avsevärt om det målas på rätt sätt. Vi rekommenderar att du besiktigar huset noggrant var sjätte månad.

2 Monteringsförberedelser

Verktyg och förberedelse av komponenter

För att montera trädgårdshuset behöver du följande verktyg:

monteringshjälp

stege

hammare

vattenpass

skruvmejsel

såg

kniv

måttband

tång

borr

Montering:

Vi rekommenderar att man är minst 2 personer vid montering.

Det är viktigt att man ser till att alla komponenter finns tillgängliga innan man börjar monteringen.

Sortera delarna och placera dem vid de 4 hörnen runt huset i rätt ordning.

Lägg stor vikt vid arbetet med grunden. En bra grund är det viktigaste för att säkerställa hållbarheten och gör att resterande arbete kommer gå lättare.

Den sista spontade panelbrädan i golv och tak kan behöva klyvas i längsled.

Viktigt!

Taket är inte dimensionerat att gå eller klättra på.

Under inga omständigheter får någon vistas på taket.

Golv:

För ett stabilare golv kan med fördel extra bärreglar läggas in under golvbrädorna.

(medföljer ej byggsatsen, ordnas från lokal byggmarknad)

RÅD: För att undvika att få stickor, rekommenderar vi att du använder arbetshandskar under monteringen.

Vi önskar dig lycka till med monteringen av trädgårdshuset och mycket glädje i många år framåt!

1. Drill a suitable hole.
2. Fix the keepers with 2.5x16 mm screws.
3. If the house has a metal door sill, the keeper is not needed.
